

ADE 24 Algae Free/AD System

Fully Automatic In-line Dosing System

**Keeps ALL Paper & Film Processor Wash Tanks,
Racks & Rollers Crystal Clean & Slime Free 24 hours a day**

- Stops Expensive Down Time
- Stops slipping & jamming of rollers
- Stops Blockages in pipe-work or flooding
- Stops algae Slime from spoiling precious Film/Prints
- Stops re-takes or hand washing due to dirty racks/tanks

Fit Hydra's ADE 24 System & Forget Algae Slime Problems!

Automatically injects Hydra Algae Free/AD directly into the water supply feeding the wash tanks. Stops dirt build-up at source and ensures finished work is clean & free from blemishes. Suitable for All Film & Paper Processors including the 1st wash tank between chemistry on E6, C41 & Reversal.

Hydra Algae Free/AD Cleaner

A Blend of safe multi-cleaning agents to stop harmful water & air borne bacteria from developing into sludge/slime. Non-caustic and non-corrosive to equipment or skin tissue.

Hydra Algae Free/AD has proven to be the safest, most efficient tank cleaner on the market. Totally compatible with All Black & White or Color Processors connected to mains water supply.

The picture alongside shows the compact dosing pump together with 5 litre container (5 1/4 quarts) and holding cradle.

How the ADE 24 in-line System Works

The system comprises of a compact dosing pump which is connected to the water supply feeding the processor wash tanks and the processors water solenoid. As the solenoid opens to allow fresh water through into the tanks Hydra Algae Free/AD is automatically injected into the water at source. The treated water circulates throughout the tanks and pipe-work.

Hydra's Economical ADE 24 system

Is only activated during the wash water cycle, making the Algae Free extremely economical in use. When the processor is on standby or is switched off, Hydra's ADE 24 system also switches off, however the wash water is still protected with Hydra Algae Free/AD during this time.

Once the processor reactivates the wash cycle, fresh Hydra Algae Free/AD is injected through with the water, ensuring tanks are protected 24 hours a day. Hydra's ADE24 system together with Hydra Algae Free/AD cuts downtime to the minimum with racks tanks and drains kept clean and clear 24/7.
