

Instant Dry Glossy White Film

ON3GWF7 (215gsm)

ILFORD OMNIJET Instant Dry Glossy White Film is a polyester-based gloss white film with an instant-dry ink receiving layer.

It is designed for use with both piezo and thermal wide format inkjet printers, and is compatible with both dye and pigment ink types. It may be used un-laminated with both dye and pigment inks to produce images for short-term indoor display. When laminated with a suitable protective film, it is ideal for long-term pop-up display applications for exhibitions, trade fairs and point-of-sale, the polyester base making it tear-resistant and dimensionally stable.

OMNIJET Instant Dry Glossy White Film is suited to both collapsible (roll-up) and frame-supported pop-up displays.

INK COMPATIBILITY

Aqueous dye-based and pigment-based inks.

PRINTER COMPATIBILITY

IMPORTANT

Designed for use with most wide format inkjet printer systems using either aqueous dye or pigment inks from major manufacturers.

It is recommended to test the compatibility of this media with the printer's automatic cutter.

AVAILABILITY

Finished rolls

Most standard widths from 24" (61cm) to 50" (127cm)

PHYSICAL PROPERTIES

Weight	215gsm
Opacity	>98%
Caliper	175micron (7mil)
Tint (L*a*b)	96.0, 0.7, -4.0
Pre Print Gloss (20°)	14%
Environmental Use	15°C–25°C (59°F–77°F), 30–70% RH non-condensing
Storage Conditions (boxed)	10°C–30°C (50°F–86°F), 10–80% RH non-condensing

When using dye-based inks:

All unprotected "instant dry" nanoporous media may suffer from "gas fading" to some degree when used with dye based inks, depending on the display environment. To extend print life, they should be displayed under glass, laminated or otherwise protected or printed with pigmented inks.
